Sansar Pathe

The more the mind is full of doubts, the more the mind will be turbulent. So, one should first have polite behavior before starting to look for Sadguru. After that meaning, once you get Sadguru, and start to listen to his advice and follow those advice, you believe in him. Because of the lack of the right teacher and right education, even though we take birth in the knowledgeable clan of the Aryan race, we are still useless, insignificant and live with diseases and unhappiness, and die in chaos as all our actions go in waste. We are all aware of the uncommon power of Shiva like sages from ancient India. They were able to achieve this extraordinary power by following Brahmacharya in their young days. This power source of Indians has been hurt at its roots for a long time now. There is nothing related to Brahmacharya in today's education. Nowadays, Indians have forgotten everything about Brahmacharya and have lost all kinds of possessions and only possess the sufferings from different kinds of complicated diseases. Whatever energy children have inherited from their parents, knowingly or unknowingly, they are just wasting them. Nobody is considering preventing this. That is why nowadays, most are suffering from KshayaRoga or tuberculosis. Because everyone's body is losing its vitality. Most people have their bodies tired and have lost their youth, their minds have no inspiration, eyesight has become weak, and hair has turned gray. It is rare to find any person without seminal diseases. Bravery is completely extinct now. Other sense organs have also lost their powers because of the current education system. Nowadays, Indians are proceeding in the path of destruction. If there are any who love their country, then they should first save their fellow Indians from this decaying disease. It is my request to all those western based social reformers and all those who focus on progress, that they should not forget about the core mantra of India's revival, they should not ignore the roots of a tree by watering the top of the tree.
